Summary

Software Developer with 3 years of professional experience designing and developing enterprise frontend and backend solutions. Experienced in building scalable applications, improving system performance, and delivering reliable software through clean architecture, efficient problem-solving, and continuous learning.

Skills

Programming Languages: JavaScript, Python, HTML, CSS

Frameworks: React.js, Node.js, Express.js, FastAPI

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Postman

Core Concepts: REST APIs, OOP, JWT Authentication, CDN, OTP, Razorpay

Experience

Software Developer **March 2024 – July 2026** *Vensyx Data Solutions Pvt. Ltd.*

- Engineered scalable RESTful APIs for enterprise applications, reducing average API response time by nearly 30% through query optimization and efficient service-layer design.
- Designed reusable frontend and backend components following SOLID principles and layered architecture, improving code maintainability and reducing development effort for new features.
- Optimized database interactions using indexing, query tuning, and batch processing techniques, resulting in faster data retrieval for high-volume requests.
- Led pair-debugging sessions and mentored 3 junior engineers, helping resolve recurring development issues and reducing repeated bugs by approximately 15% across team repositories.

Projects

AI-Powered Language Learning Platform — React.js, Node.js, Express.js, Python, MySQL

- Developed responsive React.js interfaces for an AI-powered language learning platform, implementing interactive learning and practice workflows, and improving overall user interaction and usability by 25%.
- Built secure REST APIs using Node.js and Express.js for authentication, learning content, and application workflows, optimizing API and database operations to reduce average response time by 30%.
- Integrated OpenAI Whisper for speech generation and speech-to-text processing, resolving audio format, file handling, and asynchronous API processing issues.
- Debugged and resolved issues across React.js, Node.js, Python, MySQL, and external speech APIs, reducing recurring application errors by 20% through systematic API testing, logging, and root-cause analysis.

Laundry Service Management Platform — React.js, Node.js, Express.js, MySQL

- Implemented membership-based and standard cart workflows, handling different pricing rules, cart calculations, order creation, and validation to support multiple customer purchase scenarios.
- Developed order lifecycle management with ongoing, completed, and canceled states, resolving issues with inconsistent order status updates between customer and internal operations.
- Integrated Razorpay payment processing with server-side payment verification, handling failed transactions, duplicate requests, and payment-status inconsistencies before confirming customer orders.
- Optimized Node.js APIs and MySQL queries, reducing transactional response time by approximately 30% and improving performance across cart, order, and inventory operations.

Awards & Certifications

- **Star Performer Award** : Earned for consistency in resolving high-priority production bugs and maintaining platform reliability metrics.

- **Best Team Collaboration** : Awarded for stellar collaborative support across UI/UX and QA engineering scopes during tightly scheduled sprint releases.

Education

Bachelor of Technology (B.Tech) **Graduated: 2022** *Madanapalle Institute of Technology & Science*
